AUGUST VORNDRAN NURSERY

Propagators and Growers

PRICE LIST No. 18

EVERGREENS A SPECIALTY

Evergreens • Trees

Rhododendrons and Azaleas

Shrubs • Vines

WEBSTER, NEW YORK

1062 Ridge Road

Telephone: Webster 285

TERMS AND INFORMATION

Prices are f. o. b. Webster, New York.
Packing extra at cost.

THIS LIST cancels all previous lists and prices are subject to change without notice. All orders subject to stock being unsold on receipt of order.

Terms Cash—For customers of established credit accounts will be opened due in 30 days from date of invoice. Interest at six per cent (6%) per year will be charged on all accounts from due date. Orders for C.O.D. shipment must be accompanied by one-third of the amount.

Special Selection—Plant materials specially selected at the nursery will be sold at prices commensurate with the value of the specimens chosen, irrespective of the listed prices.

SHIPPING—Please give definite shipping instructions. Otherwise we use best judgement but assume no responsibility. All shipments travel at risk and expense of purchaser.

"Standardized Plant Names" is authority for all names used in this catalog (with few exceptions).

All evergreens balled and burlapped.

* indicates lining out stock, prices on request.

B&B signifies balled and burlapped.

Webster, New York

READ BEFORE ORDERING

True to Name. We use every precaution to have our stock true to name, but in case any should prove otherwise we will replace it or refund the amount paid, but in no case will we be responsible for any sum greater than that paid us for the stock.

Guarantee. We intend to send out only first class stock that should live and grow if given proper attention after you receive it. **We cannot, and do not, guarantee it to grow,** as climatic and soil conditions may be such that the plant just cannot grow.

Claims. If any, must be made in writing within five days from receipt of stock. We cannot become responsible for damages to stock caused by droughts, floods, frosts, insects, fire, etc., and by stock not being taken from express office for several days after arrival.

Bush Cherry

Ideal for flowering hedge, single specimen or groups from which you can pick loads of fruit. Well-shaped bushes are completely covered with large, white, fragrant flowers in early spring. Leaves are a beautiful silvery green, turning to a rich red and gold in the fall. Fruit resembles a plum in shape, and is borne in clusters that at times nearly cover the limbs.

Good to Eat from the Bush. Fine for sauce. Makes wonderful, rich-flavored, dark purple jam. Juice is great for jelly and makes excellent cordial.

Bush Saves Space. Does not require the space of an ordinary plum tree, yet often bears more fruit. Can be planted as closely as 4x6 feet. Grows only 4 to 5 feet high, with 3 to 4 foot spread. Fruit in one year—No long waiting.

2-3' ----	Each \$.75	3-4' ----	Each \$1.00

NEW HYBRID BLUEBERRIES

Prices of plants	Each	3
12-18" -----	\$1.50	\$4.00
18-24" -----	2.50	6.50

Varieties listed in approximate order of ripening as follows: Weymouth, June, Rancocas, Concord, Stanley, Rubel, Jersey, Burlington.

Aluminum Sulphate

Azaleas, Rhododendrons, Blueberries, Cornus Florida, Heather, Kalmia and many other plants require an acid soil. Acid-forming organic matter, such as well rotted oak leaves, helps to increase acidity. Aluminum Sulphate is a good chemical for increasing soil acidity by using 1/4 to 1/2 pound per square yard. Also used for turning hydrangeas blue.

5 lbs., \$1.00; 50 lbs., \$5.00; 100 lbs., \$7.50

Cherry Laurel, 2 1/2 " potted plants ----- .50 ea.
Hydrangea, blue and red, 2 1/2 " potted plants .50 ea.

Directions for Planting Evergreen Tree Seeds

Planting Indoors: Use flat container 3 inches in depth any size.
100 Seeds to each square foot of planting space—12x12 inches.

Use screened sandy loam and cover seed about three times their own thickness—1-16 of an inch.

If seed beds are kept moist at all times, tiny trees should appear in about thirty to fifty days.

Liquid fertilizer can be added in accordance with manufacturer's directions.

We suggest using Vitamin B1 after growing starts, or when transplanting seedlings.

Shading is necessary—do not place in direct sunlight. Changing temperature of house will not effect growth.

Planting Outdoors: Use frame or seed bed four feet wide and any length.

Beds should contain at least three inches of screened soil.

Shading is necessary for at least two years. Lath shade with 1½ inch openings placed 12 inches above bed.

Care same as indoors, only mulching must be done during winter, with leaves, straw, humus, etc.

Trees may be transplanted when they are three or four inches tall.

Transplant about 4 in. apart. They require care for about 2 years after transplanting, then they can be removed to the field.
